## ***Congratulations on your pregnancy!***

We realize that your time is very valuable, so we ask that you complete this paperwork packet and bring it with you to your scheduled appointment.

Additionally, the day of your appointment we ask that you arrive 15 minutes early, bring your insurance card, a photo ID (driver's license), your Pharmacy phone number and any applicable co-pay, deductible, co-insurance.

We look forward to sharing this exciting experience with you. If you have any questions now or along the way, please feel free to let us know.

***-the physicians and staff of MOGA***

Patient Name: \_\_\_\_\_ Chart: \_\_\_\_\_

We realize that the choice of a physician and the relationship you share are special, and will make every effort to ensure that your physician is available for your prenatal office visits. Today, the best practice of medicine requires the full participation of both physician and patient. Whatever the need, it is always our intention to provide personal, concerned, and complete obstetric care. Because our group shares in a rotation schedule to ensure a well-rested physician, **your own physician may not be available during your delivery.** Although you may have chosen your individual physician because you preferred a male or female, **we cannot guarantee that your delivering physician will be of a particular gender.** Upon patient request we will be happy to schedule you with several different providers during your pregnancy.

Although we are advocates of natural labor and will support you if this is your plan, **we are not proponents of the “Bradley Method.”** We believe very strongly in doing what is in the best interest of both the mother and baby, **and therefore cannot adhere to the unusual expectations set forth by Bradley courses you may have attended.**

The **American College of Obstetrics and Gynecology (ACOG)** and the **State of Tennessee** recommend Screening HIV (AIDS) testing be performed on all pregnant women as part of their prenatal lab work, as treatment is now available to newborns with the HIV virus. This testing is performed in the beginning of your pregnancy, and during the third trimester. It is our policy to follow these guidelines. To perform both tests requires your permission. Please sign below giving us proper authorization.

**I authorize Memphis OB/GYN Association, P.C.  
 to perform these routine HIV screening blood tests.**

\_\_\_\_\_ **YES**      \_\_\_\_\_ **NO**

The physicians of Memphis Obstetrics and Gynecological Association appreciate you entrusting them with your medical care and hope to make your pregnancy experience as comfortable and convenient as possible.

***I have read the above and understand this information.***
