

Optional Ultrasounds

4D HD Live Ultrasound

The best images for a 4D HD ultrasound are obtained between 27-29 weeks. 4D HD ultrasounds are an elective procedure at the patient's request, and are not covered by insurance carriers. **These are scheduled on Saturdays at our Bartlett office**, and provide you with a live-action recording to take home. This is a wonderful bonding experience in which many parents-to-be enjoy participating.

Cost \$150
